Professional Summary

Aspiring IT Support and Infrastructure professional with hands-on experience gained through a 500-hour internship providing technical support in a corporate environment. Experienced in Windows deployment, hardware and software troubleshooting, network printer configuration, basic networking, and end-user support. Driven by a curiosity to understand how devices, applications, and networks work together, with the goal of delivering reliable technical solutions while continuously expanding my knowledge in IT infrastructure and systems administration.

Core Competencies

What I Can Do — Technical Troubleshooting • End-User Technical Support • Windows Deployment • Hardware & Software Installation • Network Connectivity Troubleshooting • Network Printer Configuration • Workstation Setup

Technical Skills

Operating System — Windows 10/11 • Windows Installation & Configuration

Networking — TCP/IP • IPv4 • LAN Troubleshooting • RJ45 Cable Termination & Testing • Network Printer Configuration • Basic Router Configuration • Cisco Packet Tracer

Hardware — PC Hardware Troubleshooting • Peripheral Installation & Configuration • Printer & Scanner Configuration

Software and Tools — Microsoft Office Suite • Microsoft Outlook • SAP • AnyDesk • IP Messenger • Google • Brave • Figma

Programming & Web Development — HTML • CSS • JavaScript

Experience

IT Support Intern

03/2026 – 06/2026

C&E Publishing Inc.

- Configured and deployed Windows workstations by installing and configuring required business applications, preparing devices for end-user use.
- Provided technical support by diagnosing and resolving hardware, software, printer, and network connectivity issues to support daily business operations.
- Configured network printers, created and tested RJ45 Ethernet cables, and verified LAN connectivity using Windows networking tools.
- Assisted with workstation maintenance through hardware installation, peripheral configuration, and system troubleshooting.
- Supported Microsoft Outlook configuration, email migration, and end-user assistance while collaborating with the MIS technical team.

Projects

E-Commerce Platform for PC Component Sales with AI Assistance and 3D Visualization

2025 – 2026

Capstone Project (Academic Project)

- Conducted stakeholder interviews and analyzed business workflows to gather requirements, translating business needs into system features for inventory management, sales tracking, and delivery processes.
- Coordinated project documentation, facilitated team discussions, and designed the application's user interface and user experience using Figma to support project development and usability.
- Validated system functionality through feature testing and maintained the research documentation, ensuring the platform met business requirements and incorporated AI-assisted recommendations, automated reporting, and administrative features.

Education

Bachelor of Science in Information Technology

Polytechnic University of the Philippines - Santa Maria

Mar 2022 – Aug 2026

Bulacan Philippines

Certificates

Cisco Networking Academy: Computer Hardware Basics | IT Customer Support Basics | Introduction to Cybersecurity | Introduction to Packet Tracer

Palo Alto Networks: Cloud Security Fundamentals | Data Center Security | Networks in the Cloud | Network Threats and Security
